

## *State Tax Commission Annual Report – 2017*

### **RECOMMENDATIONS TO THE MISSOURI LEGISLATURE SECTION 138.380(4), RSMO**

The Missouri State Tax Commission is the agency charged with overseeing Missouri's property tax assessment program. Our responsibilities include fair and equitable assessments, providing assistance to local assessing officials, assessing the property of railroads and utilities, and providing a remedy and recourse for taxpayers to appeal property assessments when an individual disagrees with the value or classification on their property.

Economic data for the State of Missouri continues to reflect solid growth. According to information provided by the Department of Economic Development, the Missouri Gross State Product (GSP) increased by 2.8% in current dollars and the state added over 22,000 jobs, lowering the unemployment in this state to 3.5%.

Assessment data in 2017 also reveals an improving economy. The certified aggregate wealth of taxable tangible real and personal property reflects a 5.5% increase in year over year data. New construction reported on the assessment rolls in 2017 reflect an increase of 50% over the previous two years. Overall, assessed values in the state of Missouri stand at \$107 billion. The revenue associated with the valuation of centrally assessed property is in excess of \$400 million annually.

Property tax remains the most reliable and stable source of revenue providing essential services demanded by the public. In 2017, over \$7.5 billion of property tax revenue was generated to provide the financial foundation to fund public schools, local government and other local political subdivisions. In fact, there are over 2,800 taxing entities in this state that relies on property tax revenue. Property tax is the underpinning ensuring that autonomy is realized and retained at the local level.

Pursuant to Section 138.380(4) RSMo, the State Tax Commission respectfully submits to the General Assembly recommendations designed to improve the assessment program in the State of Missouri.

#### 1. Original Assessment of Gas Distribution Companies:

State statutes provide that the State Tax Commission has the exclusive power of original assessment of the distributable property of pipeline and other public utility companies. It is unclear in the statutes whether the State Tax Commission has the sole authority to value the tangible taxable property of gas distribution companies.

The State Tax Commission employs unitary valuation methodology to determine the valuation of public utility companies. The State Tax Commission ascertains the value of these companies and apportions the value to the local taxing

## *State Tax Commission Annual Report – 2017*

jurisdictions. This methodology is favorable in that it allocates property of a system consisting of many miles of pipe which traverses several counties into a manageable taxable amount apportioned to a particular political subdivision.

Traditionally, gas distribution companies were locally based and did not cross county borders. It was reasonable for the local assessors to determine the value of such property. However, there are five gas distribution companies operating in excess of ninety counties, creating a situation in which the property is being assessed differently in each county thus resulting in the disparate treatment of similar property.

The Commission is respectfully recommending that the General Assembly amend the statutes to clarify the original assessment authority of the State Tax Commission to include gas distribution companies. Providing that authority, will ensure the uniform and equitable treatment throughout the state of property owned by gas distribution companies.

2. Cable Telephony Assessment: Technology in the field of telephony has been extremely fluid over the past few years. The lines of discipline between distinct industries have become blurred. Cable companies providing telephony services have now emerged and are providing telephony services in direct competition with traditional telephone companies. Current statutory language does not enumerate cable telephony as a public utility and as such, valuation of tangible taxable property of cable telephony (Voice Over Internet Protocol) does not fall under the auspices of the State Tax Commission.

The State Tax Commission respectfully requests amending Chapter 138 to include cable telephony as a public utility and thereby allowing the State Tax Commission to centrally assess all telephony services in Missouri thus ensuring uniformity in the treatment of taxpayers in this state.

3. Sales Disclosure Declaration: The Commission respectfully recommends to the General Assembly that statutory language be enacted providing for the statewide utilization of a sales disclosure declaration. Undeniably, mandatory sales disclosure universally is recognized by the assessment community as the “silver bullet,” ensuring uniformity in the treatment of taxpayers in this state. The State Tax Commission cannot over-emphasize the need for sales disclosure in Missouri. We renew our appeal to the General Assembly to develop statutory language mandating the use of statewide certificates of value. Unequivocally, the most important tool for the assessor is the ability to secure critical market data accurately reflecting market behavior. Sales information is the cornerstone of an assessment program intended to provide uniform and equitable assessments. According to a survey published by the International Association of Assessing Officers (IAAO), thirty-six states have some form of sales disclosure codified in their state statutes and only six states, including Missouri, do not have either a sales disclosure or other

## *State Tax Commission Annual Report – 2017*

instrument for which sales prices may be derived. In the State of Missouri, the political subdivisions of St. Louis City, St. Louis County, Jackson County and St. Charles County have passed, through local ordinances, certificates of value. The sales disclosure documents used in these jurisdictions represent nearly 50% of locally assessed real estate in the State of Missouri. Counties that do not possess certificate of value only receive a return of 15-25% on sales letters submitted. This low return is woefully inadequate to accurately represent market behavior.

In its review of State Tax Commission Ratio Study procedures, the IAAO recommends that the Commission and the Missouri Assessors' Association work with the General Assembly toward the implementation of state mandated sales price disclosure in all counties. The IAAO study points out that the American Bar Association's Tax Section has also issued a recommendation on disclosure of essential data concerning real property transfers. The IAAO cites the *IAAO Standard on Ratio Studies* which states that assessing officers in jurisdictions without laws mandating full disclosure work under a severe handicap and should seek legislation providing for such disclosure.

Assessment uniformity cannot be achieved on a consistent basis without the benefit of having accessibility to accurate sales data. The inadequate sales data severely thwarts the attempt by assessors to facilitate uniform and equitable assessments throughout the state. Passage of a statewide certificate of value will provide critical sales data which will pave the way for the full implementation of a sales/appraisal ratio study resulting in lower operational costs and more concrete results.

The Commission looks forward to working in concert with the General Assembly sharing the common goal of improving the property tax system in Missouri.

Respectfully submitted,  
STATE TAX COMMISSION OF MISSOURI  
Bruce E. Davis, Chairman  
Victor Callahan, Commissioner  
Will Kraus, Commissioner
